Computer Programming & Analysis (CO-OP), Niagara College

Sept. 2022 - Dec. 2024

WORK EXPERIENCE

Team Lead / Full Stack Developer

2025 - Present

Eastside Creations (Early-Stage Startup)

- Currently leading development of a **full-stack** mobile application, overseeing project planning, architecture, and backend development.
- Designed and implemented a scalable **PostgreSQL** database schema and **RESTful API** architecture to support core application functionality and **scalability**.
- Refactored authentication infrastructure to follow **cybersecurity** industry standards (**OWASP MASVS**), and improved image storage efficiency by over **95%** through compression and optimization strategies.
- Established development standards, planned project tasks, and coordinated work across the development team.
- Led the design and development of the company's [portfolio website](#).

Web Developer (Internship)

May 2024 - Aug. 2024

Civiconnect

- Designed web pages in **Figma**, and developed using **HTML**, **CSS**, **NextJS**, **NodeJS**, and **ReactJS** with a **mobile first** approach.
- Created a **ReactJS** custom hook to support a feature that dynamically adjusted website layouts for English and Arabic **UI/UX**.
- Designed custom components for a **Mapbox** map to interactively show house listings.
- Added a search and filter function in **ReactJS** significantly reducing the average search time through optimized filtering and API request handling. Additionally, utilized a **REST API** to integrate a Content Management System (**CMS**) to allow users to easily update website content.

PROJECTS

Portfolio Website: [linked here](#)

- Designed and developed a **Responsive** 5-page portfolio website in under 2 weeks using **HTML**, **CSS**, and **JavaScript**, following mobile-first and **WCAG accessibility** standards.

Baseball Statistics Web App

- Led a team of 4 to develop a **C#** web app for a local baseball league within 3 **Agile sprints**.
- Developed features for interactive **statistical analysis** and responsive **data visualization**.
- Coordinated client meetings and managed development workflows using **Git**.

Database Management Web App

- Developed an **ASP.NET** web application with a **C#** backend, **SQL** database integration, and secure authentication using **.NET Identity**.
